EYELINER TREATMENTS AFTERCARE INSTRUCTIONS

Careful attention needs to be taken when caring for your eyeliner post procedure, within the next 3 days your procedure will lightly scab over then slough away. Swelling may appear in the next 24 hours.

From waking the day after this procedure the area may appear swollen or puffy. The reason for this is lymphatic fluids flows to the area to heal where skin has been broken, when you are up and about the puffiness will reduce as lymphatic drainage will occur. If you experience any discomfort in the next 24 hours a cold compress may be applied to the area.

It will take 24 hours for the area to create a protective barrier; your final colour result will take 28 days. A retouch cannot in any circumstances take place until 28 days as scarring may occur.

Water or tears will wash away any pigment within the first week please be aware.

Your procedure will take 3 phases:

- HEAL
- PEEL
- FADE

DO NOT PICK OR PULL AT THE TREATED AREA

DO NOT APPLY MAKEUP OVER THE AREA FOR UP TO 7 DAYS POST TREATMENT

DO NOT TOUCH THE TREATED AREA WITH CREAMS, SOAPS, MAKEUP OR CLEANSERS FOR 7 DAYS

DO NOT EAT SPICY OR CITRUS FOODS FOR 7 DAYS

USE AFTERCARE CREAM PROVIDED USING A FINE FILM ONLY USING A COTTON BUD 3 TIMES A DAY FOR 7 DAYS

BE CAREFUL WHEN BRUSHING TEETH AS TOOTHPASTE CAN FADE COLOUR DURING THE HEALING PROCESS

IF AFTERCARE IS NOT FOLLOWED PROCEDURES WILL NOT HEAL CORRECTLY AND RESULTS WILL BE POOR

Should you have questions regarding your treatment please do not hesitate to contact me.
